SUPPLEMENTAL DECLARATION CONTINUATION SHEET

The "moving means" element in claim 8 is incorrectly described in the specification, in that the reference components parts shown primarily in Fig. 5 are not similarly-referenced in Col. 7, Lines 31-58. The reissue application and Preliminary Amendment to correct this discrepancy and ensure compliance with 35 U.S.C. §112.

With respect to the claims, I did not appreciate the full scope of the invention and submitted an independent claim 8 that was too narrow in scope. Accordingly, Applicant submits claims 36-50 which removes the limiting "guiding means" and "attaching means" elements recited in claim 8 which are not integral to the invention as recited in claim 36-50.

Dated: April 22, 2003.

Respectfully submitted,

Nicholas J. Bonge, Jr.
